SUMMARY

Information Systems undergraduate with a Bachelor of Information Systems (Hons.) in Intelligent Systems Engineering from Universiti Teknologi MARA (UiTM), currently gaining practical experience through an internship. Interested in data analytics, business intelligence, and artificial intelligence, with hands-on experience in data analysis, data visualization, dashboard development, and system projects using tools such as Power BI, Excel, and Python. A fast learner with strong teamwork, communication, and problem-solving skills, seeking to apply analytical skills and contribute to data-driven decision-making in a professional environment.

EDUCATION

Bachelor of Information System (Hons) Intelligence System Engineering **Sept 2023 - Present**
Universiti Teknologi Mara UiTM Shah Alam, Selangor
Relevant Coursework: Database Management, Data Analytics, Machine Learning, System Analysis & Design, Programming
CGPA: 3.55

Matriculation Programme (Physical Science) **July 2022 – May 2023**
Kolej Matrikulasi Pahang
Relevant Subject: Mathematics, Physics, Chemistry, Computer Science

WORK EXPERIENCE

IT Intern – Application Development
Universiti Sultan Zainal Abidin **Sept 2026 - Present**

- Contributing to the development of Sistem Profiling Pelajar (SPP), a web-based student profiling system designed to support staff in managing and accessing student information.
- Developing and improving front-end interfaces using Quasar Framework and Vue.js, with a focus on creating a clean, responsive, and user-friendly experience.
- Designing and implementing system modules and interface components, including Dashboard, Student Details, Persatuan, and Utiliti.
- Assisting in the migration and enhancement of existing legacy system interfaces to newer web technologies.
- Utilising Vue.js, Quasar Framework, Node.js, npm, Quasar CLI, and Visual Studio Code throughout the development process.

PROJECT EXPERIENCE

Cyberbullying Detection System using Deep Learning **2026**

- Developed a text classification system using Python and Google Colab
- Applied text pre-processing, balancing techniques, and feature extraction methods such as TF-IDF and Word Embedding
- Implemented CNN and BiLSTM models for classification and evaluated model performance

In-Vehicle Coupon Recommendation Analysis **2025**

- Analyzed dataset to identify user behavior and coupon acceptance patterns
- Applied machine learning concepts for recommendation insights
- Presented finding and recommendation in team project

Heart Disease Risk Prediction Decision Support System – Group Project **2025**

- Developed an interactive Power BI dashboard to analyse patient data and visualise heart disease risk levels using demographic and clinical indicators.
- Performed data analysis and visualisation using KPI cards, slicers, filters, charts, and patient-level tables to support decision-making.
- Presented finding and recommendation in team project

SKILLS

Technical Skills

- Programming Languages: Python, Java, C++, SQL
- Web Development: Quasar Framework, Vue.js, HTML, CSS
- Data Analytics & Visualization: Microsoft Excel, Power BI, Tableau (Basic)
- Data Mining & Machine Learning: WEKA, Google Colab

Interpersonal

- Time Management, Communication, Leadership, Teamwork, Problem Solving, Adaptability

Language

- Bahasa Melayu, English

EXTRACURRICULAR ACTIVITIES

Deputy Program Director – SULAM Community Project **2026**

- Assist in planning and coordinating engagement program activities
- Managed committee tasks, schedules, and event flow.
- Developed leadership, teamwork, and communication skills

Committee Member – Melati's Inspiring Resilience: Leadership with Heart **2025**

- Assisted in organizing and coordinating program activities
- Supported event operations to ensure smooth execution
- Developed teamwork, communication, and organizational skills

CERTIFICATE

Google Advanced Data Analytics Professional Certificate – Google (via Coursera)

- Applied machine learning techniques, data analysis, and predictive modeling
- Developed skills in Python-based data workflows and statistical analysis

Google Business Intelligence Professional Certificate – Google (via Coursera)

- Gained practical knowledge in business intelligence, SQL, ETL processes, and data modeling.
- Developed skills in dashboard creation, data visualization, and reporting.
- Learned to transform business requirements and data into actionable insights.

Oracle Academy: Database Programming with SQL

- Developed strong foundation in SQL queries, database design, and data manipulation

Mendeley: Effective Citation Management (UiTM)

- Learned efficient academic referencing and research organization techniques

Scopus AI: Mastering Literature Search (UiTM)

- Developed skills in advanced research, academic database usage, and information retrieval

Agentic AI for All — Ministry of Digital

- Completed a 2-hour course covering Agentic AI, prompt engineering, workflow automation, responsible AI practices, and practical AI applications.
